| <b>Course Code-<br/>BCS-111</b>             | <b>Theory Course</b>   | <b>L-T-P-C</b> | <b>4-0-0-4</b> |
| <b>Course Contents</b>                      |  |                |                |
| <b>UNIT-I</b>                               | <b>Introduction to ‘C’ Language:</b> History, C Character Set, Tokens, Keywords, Constants, Identifiers, Variables, Data Types, Comments, Structures of ‘C’ Program, Declaration, printf(), scanf(), Operators, Expressions, Statements, Arithmetic Expressions.   |                |                |
| <b>UNIT-II</b>                              | <b>Branching and Looping:</b> Two Way Selection (if, if-else, Nested if-else, cascaded if-else), Switch Statement, Ternary Operator, goto Statement, Loops (for, while, do-while) in C, break and continue Statements, Nested Loops.   |                |                |
| <b>UNIT-III</b>                             | <b>Functions:</b> Advantages of Functions, Declaring a Function, Defining a Function, Calling a Function, Argument Passing – Call by Value, Call by Reference, Types of Functions, Recursion.<br><b>Arrays:</b> Types of Arrays, Array Declaration, Array Initialization, Accessing Data From Array, Using Arrays with Functions, Multi-Dimensional Arrays.<br><b>Pointers:</b> Basics, Pointer and Function, Array Of Pointers.                             |                |                |
| <b>UNIT-IV</b>                              | <b>String:</b> Declaring, Initializing, String Manipulation Functions, String Input and Output Functions, String Pointer, Array of Strings, Passing String to Function.<br><b>Structure and Union:</b> Basic of Structures, Structures and Functions, Array of Structures, Pointer to Structure, Union.<br><b>Storage Classes:</b> Automatic, External, Static & Register.   |                |                |
| <b>UNIT-V</b>                               | <b>File Handling:</b> Introduction, File Types- Text, Binary, The File Pointer, Opening a File, Closing a File, Reading and Writing a File, File Handling Functions: fgetc(), fputc(), fputs(), fgets(), fprintf(), fscanf(), fwrite(), fread(), fseek(), ftell(), feof(), etc. Command Line Arguments.<br><b>Preprocessors:</b> Introduction to Preprocessors, Preprocessor Directives: #include, #define, Macros With Arguments, Conditional Compilations. |                |                |
| <b>Text Books</b>                           | <ol style="list-style-type: none"> <li>1. E. Balaguruswamy, “<i>Programming in ANSI C</i>”, Tata McGraw-Hill Education.</li> <li>2. Yashwant Kanetkar, “<i>Let us C</i>”, BPB Publications.</li> <li>3. E. Balaguruswamy, “<i>Object Oriented Programming with C++</i>”, Tata McGraw-Hill Education.</li> </ol>  |                |                |
| <b>Referential Books</b>                    | <ol style="list-style-type: none"> <li>1. V Rajaraman, “<i>Computer Basics and C Programming</i>”, PHI Learning</li> <li>2. Ashok N. Kamthane, “<i>Programming in C</i>”, Pearson Education.</li> </ol>  |                |                |

| Fundamentals of Computer and IT |  |                |                |
|---------------------------------|--|----------------|----------------|
| <b>Course Code-<br/>BCS-112</b> | <b>Theory Course</b>   | <b>L-T-P-C</b> | <b>4-0-0-4</b> |
| <b>Course Contents</b>          |  |                |                |
| <b>UNIT-I</b>                   | <b>Introduction to Computers:</b> Introduction, Characteristics of Computers, Block Diagram of Computer, Generations, Types of Computers and Their Features, Types of Programming Languages, Types of Memory, RAM, ROM, Secondary Storage Devices (FD, CD, HD, Pen drive), Input and Output Devices                |                |                |
| <b>UNIT-II</b>                  | <b>Number Systems:</b> Introduction to Binary, Octal, Decimal, Hexadecimal Number Systems, Conversion, Simple Addition, Subtraction, Multiplication and division.<br><b>Algorithm and Flowcharts:</b> Definition, Characteristics, Advantages and Disadvantages, Symbols of Flow Chart.                            |                |                |
| <b>UNIT-III</b>                 | <b>Operating System and Services:</b> Types of Operating System, Features of Operating System, Functions and Services of Operating System. DOS – History, Files and Directories, Internal and External Commands, Batch Files. Windows - History, Icons, Files and Folders, Control Panel, Task Bar, Desktop.       |                |                |
| <b>UNIT-IV</b>                  | <b>Internet and its Tools:</b> Introduction, Usage, Internet Evolution, Basic Internet Terminology, Data over Internet, Modes of Data Transmission, Types of Networks, Types of Topologies, Protocols used in the Internet, Internet Applications, IP address, Getting Connected to Internet Applications, Ethics. |                |                |
| <b>UNIT-V</b>                   | <b>E-Mail:</b> Creating E-mail Account, Sending E-mail, Reading E-mail.<br><b>Emerging Trends in IT:</b> Introduction, Portal, Blogging, E-Learning and wiki, Social Networking, Electronic Commerce (E-Commerce), Electronic Data Interchange (EDI), Smart Cards, Mobile Communication, Internet Protocol TV      |                |                |
| <b>Text Books</b>               | <ol style="list-style-type: none"> <li>1. P.K. Sinha, “<i>Fundamental of Computers</i>”, BPB Publications.</li> <li>2. V. Rajaraman, “<i>Fundamental of Computers</i>”, Prentice-Hall of India.</li> </ol>   |                |                |

| <b>UNIT-I</b>                   | <b>The Multidisciplinary Nature Of Environmental Studies:</b><br>Definition, Scope and Importance, Need for Public Awareness.   |                |                |
| <b>UNIT-II</b>                  | <b>Natural Resources:</b> Renewable And Non-Renewable Resources;<br><b>Natural Resources and Associated Problems: -</b><br>A) Forest Resources: Use and Over-Exploitation, Deforestation, Case Studies. Timber Extraction, Mining, Dams and Their Effects on Forests and Tribal People.<br>B) Water Resources: Use and Over-Utilization of Surface and Groundwater, Floods, Drought, Conflicts Over Water, Dams-Benefits and Problems.<br>C) Mineral Resources: Use and Exploitation, Environmental Effects of Extracting and Using Mineral Resources, Case Studies.<br>D) Food Resources: World Food Problems, Changes Caused By Agriculture and Overgrazing, Effects of Modern Agriculture, Fertilizer-Pesticide Problems, Water Logging, Salinity, Case Studies.<br>E) Energy Resources: Growing Energy Needs, Renewable and Nonrenewable Energy Sources, Use of Alternate Energy Sources, Case Studies<br>F) Land Resources: Land as a Resource, Land Degradation, Man Induced Landslides, Soil Erosion and Desertification.<br>Role of an Individual In Conservation Of Natural Resources; Equitable Use of Resources for Sustainable Lifestyles |                |                |
| <b>UNIT-III</b>                 | <b>Ecosystems:</b><br>Concept of an Ecosystem; Structure and Function of an Ecosystem; Producers, Consumers and Decomposers; Energy Flow in the Ecosystem; Ecological Succession; Food Chains, Food Webs and Ecological Pyramids; Introduction, Types, Characteristic Features, Structure And Function of the Following Ecosystem: -<br>A) Forest Ecosystem<br>B) Grassland Ecosystem<br>C) Desert Ecosystem<br>D) Aquatic Ecosystems (Ponds, Streams, Lakes, Rivers, Oceans, Estuaries)  |                |                |
| <b>UNIT-IV</b>                  | <b>Biodiversity and Its Conservation:</b><br>Introduction – Definition: Genetic, Species and Ecosystem Diversity; Biogeographically Classification of India; Value of Biodiversity: Consumptive Use, Productive Use, Social, Ethical, and Aesthetic and Option Values; Biodiversity at Global, National and Local Levels; India as a Mega-Diversity Nation; Hot-Sports of Biodiversity; Threats to Biodiversity: Habitat Loss, Poaching of Wildlife, Man-Wildlife Conflicts; Endangered and Endemic Species of India; Conservation of Biodiversity: In-Situ and Ex-Situ Conservation of Biodiversity.   |                |                |

|                          |   |
|--------------------------|---|
| <b>UNIT-V</b>            | <b>Environmental Pollution:</b><br>Definition, Causes, Effects and Control Measures of Air Pollution, Water Pollution, Soil Pollution, Marine Pollution, Noise Pollution, Thermal Pollution, Nuclear Pollution; Solid Waste Management: Causes, Effects and Control Measures of Urban and Industrial Wastes; Role of an Individual in Prevention of Pollution; Pollution Case Studies; Disaster Management: Floods, Earthquake, Cyclone and Landslides.   |
| <b>UNIT-VI</b>           | <b>Social Issues and The Environment:</b><br>From Unsustainable to Sustainable Development; Urban Problems Related to Energy; Water Conservation, Rain Water Harvesting, Watershed Management; Resettlement and Rehabilitation of People; Its Problems and Concerns. Case Studies; Environmental Ethics: Issues and Possible Solutions; Climate Change, Global Warming, Acid Rain, Ozone Layer Depletion, Nuclear Accidents And Holocaust. Case Studies; Wasteland Reclamation; Consumerism And Waste Products; Environment Protection Act; Air (Prevention and Control Of Pollution) Act; Water (Prevention and Control Of Pollution) Act; Wildlife Protection Act; Forest Conservation Act; Issues Involved in Enforcement of Environmental Legislation; Public Awareness |
| <b>UNIT-VII</b>          | <b>Human Population and The Environment:</b><br>Population Growth, Variation Among Nations; Population Explosion: Family Welfare Programme; Environment and Human Health; Human Rights; Value Education; Women and Child Welfare; Role of Information Technology in Environment and Human Health; Case Studies  |
| <b>UNIT-VIII</b>         | <b>Field Work:</b> <ul style="list-style-type: none"> <li>• Visit to a Local Area to Document Environmental Assets-River/ Forest/ Grassland/ Hill/ Mountain.</li> <li>• Visit to a Local Polluted Site – Urban/ Rural/ Industrial/ Agricultural</li> <li>• Study of Common Plants, Insects, Birds.</li> <li>• Study of Simple Ecosystems-Pond, River, Hill Slopes, etc. (Field Work Equal to 5 Lecture Hours).</li> </ul>   |

| Course Contents  |                      |                |                |
| <p><b>Practical Work should be based on office automation tools - Word, Excel, and Power Point and will cover the following topics:</b></p> <p><b>Office Tools:</b> Basic Concepts, Uses.</p> <p><b>Word:</b> Menu Bar, Menus, Submenus, Tool Bar, Tools, Customizing Toolbar, Hiding Toolbar, Creating and Saving Documents, Working with an Existing Document, Auto Text, Auto Complete and Auto Correct; Formatting a Document, Word Art, Using Tables and Columns-Table Creation and Modification Giving Stress to Auto-Fit, Auto-Format; Object Linking and Embedding, Inserting and Sizing Graphics, Hyperlink, Envelopes &amp; Label Creation, Grammar &amp; Spell Check, Previewing and Printing Documents, Mail Merge.</p> <p><b>Excel:</b> Creating a Simple Spreadsheet, Editing a Spreadsheet, Working with Functions and Formula, Formatting Worksheets, Creating Charts, Inserting and Formatting Data in a Worksheet, Working with an Existing Data List, Auto Fill, Fill Series and Auto- complete Options, Formatting Cells; Sorting &amp; Filtering Data, Conditional Formatting, Interlinking Worksheets and Files, Setting Filters and Performing Calculations on Filtered Data etc.</p> <p><b>Power Point:</b> Creating and Viewing Presentations, Editing a Presentation, Editing Master Slides, Inserting, Sorting, Hiding and Deleting Slides, Inserting Pictures, Creating Tables, Slide Layouts, Adding Transition and Animation Effect, Hyper Linking Slides &amp; Files.</p> |                      |                |                |

| Data Structure and Algorithms Using C |  |                |                |
|---------------------------------------|--|----------------|----------------|
| <b>Course Code-<br/>BCS-121</b>       | <b>Theory Course</b>   | <b>L-T-P-C</b> | <b>4-0-0-4</b> |
| Course Contents                       |  |                |                |
| <b>UNIT-I</b>                         | <b>Introduction:</b> Basic Terminology, Data Structures, Classification of Data Structures, Data Structure Operations, Complexity.<br><b>Array:</b> Definition, Declaration, Initialization of Array, Accessing Elements of Array, Multidimensional Arrays, Sparse Matrix, Lower and Upper Triangular Matrices, Vector, Memory Representation of Array- Row Major and Column Major, Address Calculation of Array, Insertion and Deletion on Array. |                |                |
| <b>UNIT-II</b>                        | <b>Linked List:</b> Introduction, Dynamic Memory Allocation, Singly Linked Lists, Operations on Linked List Such as Traversal, Insertion, Deletion and Searching, Use of Headers, Introduction to Circularly Linked Lists and Doubly Linked Lists, Two-Way Lists, Polynomial representation.   |                |                |
| <b>UNIT-III</b>                       | <b>Stacks and Queues:</b> Introduction and Primitive Operations on Stack, Stack Applications; Infix, Postfix, Prefix Expressions; Evaluation of Postfix Expression; Conversion among Prefix, Infix and Postfix; Recursion; Introduction and Primitive Operation on Queues, Deques, Priority Queues, Applications of Queue, Array and Linked list representation of Stack and Queue   |                |                |
| <b>UNIT-IV</b>                        | <b>Trees:</b> Introduction and Basic Terminology; Tree Representations as Array & Linked List, Recursive algorithms for Tree Operations such as Insertion, Deletion, Traversal; Traversal of Binary Trees; Application of Binary Trees; Binary Search Tree (BST), Insertion and Deletion in BST, B-Tree, B+ Tree.  |                |                |
| <b>UNIT-V</b>                         | <b>Searching &amp; Sorting Techniques:</b> Bubble Sort, Insertion sort, Selection sort, Quick Sort, Merge Sort, Heap Sort, Linear Search, Binary Search and Hashing.   |                |                |
| <b>Text Books</b>                     | 1. Tenenbaum, “ <i>Data Structures Using C</i> ”, Pearson Education.<br>2. Samir Kumar Bandyopadhyay, K. N. Dey, “ <i>Data Structures Using C</i> ”, Pearson Education.<br>3. Lipschutz (Schaum’s Series), “ <i>Data Structure with C</i> ”, Tata McGraw Hill Education  |                |                |
| <b>Referential Books</b>              | 1. Robert Kruse, C. L.Tondo, “ <i>Data Structures and Program Design in C</i> ”, Pearson Education.<br>2. E. Horowitz, S. Sahni & D. Mehta, “ <i>Fundamentals of Data Structures</i> ”, Galgotia Publications.<br>3. R. S. Salaria, “ <i>Data Structures &amp; Algorithms</i> ”, Khanna Book Publishing Co. | Database Management System      |   |                |                |
|---------------------------------|---|----------------|----------------|
| <b>Course Code-<br/>BCS-122</b> | <b>Theory Course</b>  | <b>L-T-P-C</b> | <b>3-0-0-3</b> |
| Course Contents                 |   |                |                |
| <b>UNIT-I</b>                   | <b>Introduction:</b> Characteristics of Database Approach, File Management System Vs DBMS, Components of DBMS, DBMS Architecture, Data Abstraction, Data Independence, DBMS Models, Database Languages, Types of Database Users, Role of Database Administrator.<br><b>E-R Modeling:</b> Introduction, Entity Relationship Diagram, Entity, Entity Types, Entity Set, Attributes and Key, Relationships, Relation Types, Roles and Structural Constraints, Concepts of Composite, Derived and Multi-valued Attributes; Super Key, Candidate key, Primary Key, Strong and Weak Entities, Reducing ER Diagram to Tables, Enhanced Entity-Relationship Model (EER Model), Object Modeling, Sub Classes, Super Classes, Inheritance, Generalization and Specialization, Constraints on Specialization and Generalization. |                |                |
| <b>UNIT-II</b>                  | <b>Relational Data Model:</b> Relational Model Concepts, CODD's Rules, Relational Constraints<br><b>Relational Algebra:</b> Selection and Projection, Set Operations, Renaming, Join, Division.<br><b>Data Normalization:</b> Anomalies, Functional Dependencies, FDs and Keys, Multivalued and Join Dependencies, Normal forms (1NF, 2 NF, 3NF and BCNF, 4NF, 5NF), De-Normalization, Lossless Join and Dependency Preserving Decomposition.   |                |                |
| <b>UNIT-III</b>                 | <b>SQL:</b> Overview, Characteristics of SQL, Advantage of SQL, SQL Data Types and Literals, Types of SQL commands-DDL, DML, DCL, Basic SQL Queries. Constraint Specifications: Primary Key, Not NULL, Unique, Check, Referential key; <b>Logical Operators</b> -BETWEEN, IN, AND, OR and NOT, LIKE; Aggregate Operators-The GROUP BY and HAVING Clauses; Nested Queries, Correlated Nested Queries, Set-Comparison Operators, Joins-Inner joins, Outer Joins, Left outer, Right outer, full outer joins; Overview of views and indexes.  |                |                |
| <b>UNIT-IV</b>                  | <b>Transaction Processing and Concurrency Control:</b> Definition Of Transaction, Desirable ACID Properties, Overview of Serializability, Serializable and Non-Serializable Transactions; Definition of Concurrency, Lost Update, Dirty Read And Incorrect Summary Problems Due to Concurrency, Locking, 2PL, Timestamp Ordering.   |                |                |
| <b>UNIT-V</b>                   | <b>Database Security and Recovery:</b> System Failure, Backup and Recovery Techniques, Authorization and Authentication.<br><b>File Organization:</b> Sequential Access File, Indexed Sequential Access Files, Direct Access File, Indexing, Multilevel Indexing, B & B+ Trees, Hashing, Hashing Functions, Collision Resolution, Extendible Hashing, and Dynamic Hashing.  |                |                |
| <b>Text Books</b>               | 1. Abraham Silberschatz, Henry Korth, S.Sudarshan, "Database Systems Concepts", McGraw Hill.<br>2. Navathe, "Fundamental of database Systems", Pearson Education.   |                |                |
| <b>Referential Books</b>        | 1. Jim Melton, Alan Simon, "Understanding the new SQL: A complete Guide", Morgan Kaufmann Publishers.<br>2. A.K.Majumdar, P. Bhattacharya, "Database Management Systems", Tata McGraw Hill.<br>3. Bipin Desai, "An Introduction to database systems", Galgotia Publications   |                |                |

| Applied Mathematics-II          |   |                |                |
|---------------------------------|---|----------------|----------------|
| <b>Course Code-<br/>BCS-123</b> | <b>Theory Course</b>  | <b>L-T-P-C</b> | <b>4-0-0-4</b> |
| Course Contents                 |   |                |                |
| <b>UNIT-I</b>                   | <b>Differential Equations:</b><br>Linear differential equations of nth order with constant coefficients, Complementary function and Particular integral, Simultaneous linear differential equations, Solution of second order differential equations by changing dependent & independent variables, Normal form, Method of variation of parameters, Applications(without derivation).   |                |                |
| <b>UNIT-II</b>                  | <b>Series Solution and Special Functions:</b><br>Series solution of second order ordinary differential equations with variable coefficient (Frobenius method), Bessel and Legendre equations and their series solutions, Properties of Bessel function and Legendre polynomials.  |                |                |
| <b>UNIT-III</b>                 | <b>Laplace Transform:</b><br>Laplace transform, Existence theorem, Laplace transforms of derivatives and integrals, Initial and final value theorems, Unit step function, Dirac- delta function, Laplace transform of periodic function, Inverse Laplace transform, Convolution theorem, Application to solve simple linear and simultaneous differential equations.  |                |                |
| <b>UNIT-IV</b>                  | <b>Fourier Series:</b><br>Euler's Formulae, Functions having arbitrary periods, Periodic functions, Fourier series of period $2\pi$ , Change of interval, Even and odd functions, Half range sine and cosine series   |                |                |
| <b>UNIT-V</b>                   | <b>Partial Differential Equations:</b><br>Solution of first order partial differential equations by Lagrange's method, Solution of second order linear partial differential equations with constant coefficients, Classification of second order partial differential equations, Method of separation of variables for solving partial differential equations, Solution of one and two dimensional wave and heat conduction equations, Laplace equation in two dimension, Equation of transmission lines. |                |                |

| Course Contents              |  |                |                |
| <b>UNIT-I</b>                | <b>Introduction:</b> Web Page, Website, Web Browser, Internet Address, Uniform Resource Locator(URL), Web Essentials: Clients, Servers, and Communication; Web Servers-Apache, IIS, Proxy Server,HTTP Request Message-Response Message; Web Hosting, TCP/IP Protocol Suite, Installation and Managing Web-Server: IIS/XAMPP/LAMP, Browser Architecture and Web Site Structure  |                |                |
| <b>UNIT-II</b>               | <b>HTML:</b> Basics of HTML, Formatting and Fonts, Commenting Code, Color, Hyperlink, Lists, Tables, Images, Forms, XHTML, Meta Tags, Character Entities, Frames and Frame Sets,AudioandVideo  |                |                |
| <b>UNIT-III</b>              | <b>Cascading Style Sheets (CSS):</b> Need for CSS, Introduction to CSS, Basic Syntax and Structure, Using CSS, Background Images, Colors and Properties, Manipulating Texts, Fonts, Borders and Boxes, Margins, Padding, Lists   |                |                |
| <b>UNIT-IV</b>               | <b>XML:</b> Introduction, Features, XML Document Structure, XML Markups-Element Markup, Attribute Markup, Naming Rules, Components, Comments, Document Type Definitions (DTD)– Internal and External DTD, Developing DTD, Well Formed XML Documents, Valid XML Documents, Validating an XML document using a DTD, XML Schema, Displaying XML Documents, XSL and CSS, XML Namespaces, XML DOM, eXtensible Stylesheet Language Transformations (XSLT). |                |                |
| <b>UNIT-V</b>                | <b>Java Script-</b> Introduction, Client-Side JavaScript, Server-Side JavaScript, Data Types, JavaScript Objects, Control Structures, Function, Operators, Statements, Document and Its Associated Objects, Events and Event Handlers, JavaScript Security.  |                |                |
| <b>Text Books</b>            | <ol style="list-style-type: none"> <li>1. AravindShenoy, “<i>Thinking in HTML</i>”, Packt Publishing.</li> <li>2. Suehring “<i>Java Script Step by Step</i>”,Prentice Hall India Learning Private Limited.</li> <li>3. Behrouz A. Forouzan, “<i>Data Communication and Networking</i>”, Tata McGraw Hill.</li> </ol>   |                |                |
